ATEX
Temperature control in explosion-proof areas
Our temperature control solution for explosion-proof areas includes a pressurised enclosure into which a temperature control unit is integrated. The overlay gas creates an overpressure in the housing to prevent the ingress of an explosive gas mixture.

The ATEX housing can only be ordered in combination with a water-cooled Unistat. The size of the enclosure depends on the size of the selected Unistat.

**Features:**
- Only for water-cooled Unistats
- Pressurised enclosure
- Excess temperature control
- Leak detection
- Ex II 2 G Ex pxb IIB T4 Gb

**Technical Data:**
- Housing material: stainless steel
- Superimposed gas: compressed air
- Pressure connection: R1/4”
- Cooling water connection: R3/4”
- Power supply: 400V 3~50 Hz

**Scope of delivery:**
- Control of print overlay Ex px cabinet
- Isolator for external Pt100 temperature sensor
- Isolator for Ethernet connection
- Operation instructions for Ex px cabinet
- Approval description for Ex II 2 G Ex pxb IIB T4 Gb
- Documentation

**User interface**
The temperature control unit can still be operated via the Pilot ONE using the touch screen. The touch screen is protected by a flap with a viewing window.

**Technical requirement compressed air supply**
The quality of the purge gas must comply with the compressed air quality classes according to DIN ISO 8573-1 of class 1 to ensure trouble-free operation of the Ex px cabinet.

This performance specification does not release from the obligation to install and operate the equipments in accordance with its operating instructions.
ATEX Data communication

Pilot Remote-Software ATEX

The Pilot Remote software enables the complete remote control of Huber temperature control units with Pilot ONE via a Windows PC. The user display of the Pilot ONE is mirrored on the PC, this means identical operation on the PC and the temperature control unit. The communication is via Ethernet network connectivity with a secure authentication and encoding.

- Remote control of any number of temperature control units with Pilot ONE
- Secure Ethernet connection with authentication
- Runs under Microsoft Windows 7/8/10 (32/64 bit)
- ATEX version for use in hazardous areas
- With license key (valid for a Windows PC, hardware-bound)

SpyControl-Software

SpyControl is a software solution for Windows PC’s for device control as well as for viewing and the documentation of process relevant data. Communication with the temperature control unit is via RS232, USB or TCP/IP. Recorded data is displayed over time, with the y-axes of the diagram are automatically adjusted. The x-axis (time) can be adjusted to zoom into a time period ending in the current time.

Remote control EEX Panel 15,0"

with stainless steel housing for wall mounting for Huber temperature control units with Pilot ONE

- Explosion protection zones 1 and 21:
  - ATEX marking:
    - Gases/vapours: II 2G Ex db eb q [ib] IIC T4 Gb
    - Dust: II 2D Ex tb IIIC T120 °C Db
  - IECEx marking:
    - Gases/vapours: Ex db eb q [ib] IIC T4 Gb
    - Dust: Ex tb IIIC T120 °C Db
- Power Supply: AC 100-230V
- Protection class: IP54
- Weight: 55 kg

- Storage: 128 GB SSD hard disk space, 8 GB RAM memory
- Operating system: Windows 10 IoT LTSB 64-bit
- Ambient temperature range 0 °C to 50 °C
- Ethernet cable, shielded, 25m, CAT6
- Stainless steel housing with built-in POLARIS Panel PC 15" for wall mounting
  - Housing material: stainless steel 1.4404
  - Protection class: IP54
  - Dimensions (W x D x H): 650 x 150 x 550mm
