Huber USA Services

Commissioning

A proper commissioning of the temperature control unit ensures a smooth start up and reliable operation. This saves time and operator guesswork during the initial start-up process.

Important Benefits:

- Smooth start up can save time
- Optimizes operation of the unit the first time
- Operator instruction for versatile features and performance of unit
- Equipment downtime is decreased due to proper start up
- Helps with compliance information

Components:

- Confirm proper installation
- Start up of unit including filling of heat transfer fluid and air purge functions
- Optimize performance and performance analysis of complete system
- Commissioning Protocol for reference once commissioning complete
- Operator training

Preventive Maintenance

Consistent oversight and servicing of your Huber equipment is an important part of facilities management. The goal of a successful servicing program is to establish consistent practices designed to improve the performance and safety of the equipment at your facility.

Important Benefits:

- Equipment downtime and large-scale repairs are decreased
- Better conservation of assets and increased life expectancy
- Reduced operating costs
- Verified safety and performance
- Helps with compliance information
- 10% discount on spare parts and service labor the following year

Components:

- Safety Functions Check
- Refrigeration, Electrical and Mechanical Checks
- Performance Analysis
- Preventive Maintenance Protocol to track performance throughout life of system

Preventive Maintenance

Huber USA Services

Carefree Packages

The carefree package includes additional services to improve the performance, safety and reliability of the temperature control unit.

Important Benefits:

- In addition to the commissioning and maintenance benefits
- Full documentation of the TCU parameters
- Helps with compliance information
- Cost benefit and simple budgeting
- Optimum operation of the TCU
- Full use of features and performance
- Better conservation & increased life expectancy

Components:

- Equipment downtime & large-scale repairs are decreased
- Better conservation of assets and increased life expectancy
- Reduced operating costs
- Verified safety and performance
